PROFESSIONAL SUMMARY

A final year undergraduate student, pursuing Bachelors of Computer Applications (Honors with Research), with an experience in full stack development and data analysis, having a keen interest in software development, big data and artificial intelligence, dedicated towards solving complex problems and bringing out of the box ideas and solutions, having two research papers accepted in the field of Artificial Intelligence under SCOPUS index.

WORK EXPERIENCE

DATA ANALYST INTERN

2 May 2025 – 2 July 2025

Edulyt India, Dwarka, New Delhi

- Analysed the customer dataset, consisting of 1,00,000+ rows, to analyse expenditure trends using Python and its libraries.
- Built an enhanced system that suggests different offers and card options to customers to manage their funds.

FULL STACK WEB DEVELOPMENT INTERN

14 May 2024 – 1 July 2024

Revfin Services Private Limited, Nehru Place, Delhi

- Created a login system using ReactJS, NestJS and MongoDB.
- Improved the authentication system by using tokens to authorise the user on the fleet management website based on email address and One Time Password (OTP) system.
